Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response

1. The Response filed on 2/15/2005 has been received and made of record
2. Applicant's argument with respect claims 1-4, and 6-8, 12, and 14 have been fully considered but are not moot in view of new grounds of rejection.

Allowable Subject Matter

3. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claims 9-11, 13 and 15 are allowed.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-4, and 6-8, 12, and 14 rejected under 35 U.S.C. 103(a) as being unpatentable over Kageyama U.S. Patent No. 2002/0018681[hereinafter Kageyama]

As per claims 1, 12 and 14, Kageyama discloses an equipment management apparatus (300) for transmitting management information collected from a plurality of equipment (network devices 2200) to a centralized management apparatus (management workstation 400), comprising:

a detector (2100) for detecting a trouble which has occurred in first equipment (2200) (see fig. 1 and paragraph 0078-0084);and

a transmission controller (300) for, when the trouble is detected by the detector, transmitting management information about second equipment which is other than the first equipment together with the trouble information about the first equipment to the centralized management apparatus (computer 400) (see fig. 1 and paragraph 0078-0084);

Kageyama is silent regarding: transmitting management information about second equipment .

Nonetheless, transmitting management information about second equipment would have been an obvious modification to Kageyama's system. Furthermore, Kageyama discloses database 2121 stores individual printer management information of plurality of printers and when trouble is detected on printer 2200, the printer controller transmits the trouble detected together with printer data database 2121 (see paragraph 0078-0084). Given the teaching of Kageyama one skilled in the art at the time of the invention would have readily recognized the advantage of transmitting management information of second equipment such that proactive printer management can be made, thus enabling to minimize down time of printers.

As per claim 2, Kageyama discloses an equipment management apparatus according to claim 1, wherein the transmission controller responds to the detection of the trouble by

Art Unit: 2157

the detector, and obtains the management information from the second (see paragraph 0088-0091)

As per claim 3, Kageyama discloses an equipment management apparatus according to claim 1, wherein the transmission controller transmits management information about a plurality of equipment including the second equipment (see fig. 1 and see paragraph 0088-0091)

As per claim 4, Kageyama discloses an equipment management apparatus according to claim 1 further comprising a selector for selecting the second equipment among the plurality of equipment based on a specified condition (i.e., status condition) (see fig. 1 and see paragraph 0088-0091)

As per claim 6, Kageyama discloses an equipment management apparatus according to claim 4, wherein the specified condition is characteristics of each of the equipment, and the selector selects the second equipment based on the characteristics of each of the equipment)(see col.4, lines 48-64 and col. 6, lines 1-11).

As per claim 7-8, Kageyama discloses an equipment management apparatus according to claim 1, wherein the equipment is an image forming apparatus for forming an image on a sheet (see fig. 1 and see paragraph 0088-0091).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
